

# Writing Blog Posts

Step 1: To create a new post, go to your dashboard. Hover the cursor over the word “Posts” until a small menu appears. Choose “New post” from this menu.

Step 2: You will have two fields to fill out when creating a post: a small one for the title and a large one for the body of the blog post.

Step 3: When you are finished writing the title and body of the post, create a category or choose an already existing category.
